Subject: Priorities of Survival after a life and death situation

Sent: 10 July 05

There is no one predetermined set of priorities that applies to every situation, the following order applies to many.

- 1) Render first aid
- 2) Prepare signaling devices
- 3) Procure water
- 4) Find or build a shelter
- 5) Procure food
- 6) Prepare to travel, if necessary.

Number "2)" would not apply right after a PS but could apply if a hunting party that is separated from a base camp gets into trouble.

The above was taken from "How to Survive on Land and Sea" fourth edition, Naval Institute press.
