Table 2-I.	Physical Properties of Nerve Agents	2-1
2-II.	Likely Signs and Symptoms of GB Poisoning Shown in Terms of Vapour Exposure and Approximate Blood Acetylcholinesterase Depression	2-4
2-III.	Signs and Symptoms of Nerve Agent Poisoning	2-5
2-IV.	Time Course of Effects of Nerve Agents	2-8
2-V.	Effectiveness of Various Oximes in the Treatment of Nerve Agent Poisoning	2-16
2-VI.	Examples of Current Dosing Scheme for the Intravenous Administration of Oximes	2-16
2-II.	Loading Doses and Infusion Rates for Oxime Administration to Obtain a Plasma Concentration of 4 mg.l ⁻¹	2-17
3-I.	Physical Properties of Vesicants	3-18
4-I.	Physical Properties of Lung Damaging Agents	4-2
5-I.	Physical Properties of Cyanogen Agents	5-6
6-I.	Signs and Symptoms Produced by Incapacitating Agents	6-3
7-I.	Properties of CA and BA	7-5
7-II.	Properties of Vomiting Agents	7-6
9-I.	Composition of Herbicides	9-1
11-I.	Potential Interactions of Chemical/Conventional Injuries	11-10
11-II.	Heat Casualty Prevention Guide	11-14
12-I.	Effect of Certain Agents on the Appearance of Food	12-2
12-II.	Effect of Chemical Agents on Food	12-3
12-III.	Maximum Allowable Concentrations of Agents in Drinking Water	12-6
C-I.	Effects of Chemical Agents	C-3
